

We're Hiring

Developmental Pediatrician, Cleft Palate and Craniofacial Disorders Program

BC Children's Hospital/Sunny Hill Health Centre

BC Children's Hospital and Sunny Hill Health Centre are seeking a skilled Developmental Pediatrician to join our Cleft Palate and Craniofacial Disorders Program within the Child Development and Rehabilitation department. In this essential role, you will provide comprehensive care for children with cleft lip and palate, craniofacial anomalies, and related developmental challenges. Your expertise will be crucial in conducting thorough assessments to evaluate developmental, behavioral, and medical needs, guiding families through tailored treatment plans that promote optimal growth and development.

As part of a collaborative, multidisciplinary team that includes surgeons, speech-language pathologists, occupational therapists, and social workers, you will coordinate care across various settings, ensuring a holistic approach to treatment. You will also be actively involved in the development and implementation of intervention strategies that address the unique needs of each child, facilitating their journey toward improved functional outcomes and quality of life.

In addition to clinical responsibilities, you will have the opportunity to engage in teaching and mentoring of medical students and residents, sharing your knowledge and fostering the next generation of healthcare professionals. Participation in research initiatives aimed at enhancing care for children with craniofacial disorders is also encouraged, allowing you to contribute to advancements in pediatric healthcare. Join us in this impactful role at BC Children's Hospital, where you can make a significant difference in the lives of children and their families while furthering your career in a supportive and dynamic environment.
