

We're Hiring

Physiatrist-Neuromotor Disorders Division of Developmental Pediatrics

BC Children's Hospital/Sunny Hill Health Centre for
Children, University of British Columbia

BC Children's Hospital and Sunny Hill Health Centre are excited to invite applications for the position of Physiatrist in our Neuromotor Disorders Division within Developmental Pediatrics. In this vital role, you will provide expert clinical care for children with a range of complex neuromotor disorders, including cerebral palsy, spina bifida, and other conditions affecting motor function and mobility. You will conduct comprehensive evaluations to assess physical, cognitive, and functional abilities, ensuring a holistic understanding of each patient's needs.

Working collaboratively with a multidisciplinary team of pediatricians, occupational and physical therapists, speech-language pathologists, and social workers, you will develop and implement individualized treatment plans aimed at maximizing each child's potential for independence and quality of life. Your role will also involve coordinating care across various settings, including inpatient, outpatient, and community resources, to ensure continuity and comprehensive support for families.

In addition to direct patient care, you will play a key role in educating and mentoring medical students, residents, and allied health professionals, fostering a culture of learning and innovation within the hospital. You will have the opportunity to engage in research initiatives aimed at advancing pediatric rehabilitation practices and improving health outcomes for children with neuromotor challenges. Join us in this rewarding position at BC Children's Hospital, where you can make a lasting impact on the lives of children and their families while furthering your career in a supportive and dynamic environment.
