

What makes the

Education Program for Immunization Competencies

an EPIC choice for immunization training?

The **Education Program for Immunization Competencies (EPIC)** is an online, self-directed program for all health care providers who administer vaccines. The **new** 4th edition is now available!

Comprehensive content

EPIC covers all aspects of safe, effective immunization practice and delivery, including vaccine development, adverse events, documentation, pain management, storage and handling, and more.

Strategies to improve vaccine acceptance

EPIC prepares learners to answer common questions, assuage fears, and communicate effectively about vaccines, including COVID-19 vaccines.

95%

of respondents to the PHAC Health Care Provider survey indicated that additional training on vaccine hesitancy would be useful for their practice.

Source

Relevant for all health care professionals

EPIC was developed by an interprofessional team, including doctors, nurses and pharmacists, to meet the needs of learners in various practice settings.

Accredited education

EPIC is accredited by the Royal College of Physicians and Surgeons of Canada and the Canadian Council on Continuing Education in Pharmacy.

9,100

The number of health care providers enrolled in the 3rd edition of EPIC

96%

of learners report that they would recommend EPIC to a colleague
