

Effective PPV

First Assessment

Heart Rate After 15 Seconds of Ventilation

Increasing

- Announce "Heart rate is increasing"
- Continue ventilation
- Second HR assessment after another 15 seconds of ventilation

Not Increasing Chest IS Moving.

- Announce "Heart rate NOT increasing, Chest IS moving"
- Continue ventilation that moves the chest
- Second HR assessment after another 15 seconds of ventilation that moves the chest

Not Increasing Chest NOT Moving

- Announce "Heart rate NOT increasing, Chest is NOT moving"
- Ventilation corrective steps until chest movement with ventilation
 - Intubate or laryngeal mask if necessary
- Announce when chest is moving
- Continue ventilation that moves the chest
- Second HR assessment after 30 seconds of ventilation that moves the chest
